Study Abroad ^[1]

We highly encourage students to take advantage of study abroad opportunities. The [International Engineering Education Office](#) ^[2] (ETC 7.126) has more information on study abroad opportunities. These credits will transfer as in-residence and students will receive a grade to be applied to their GPA. In addition, credits may also be applied towards the Academic Enrichment Technical Area, upon approval from the ECE Undergraduate Advising Office. To get more specific information, please stop by ENS 135 for a brochure, or contact the International Engineering Education Office (ETC 7.126).
