

# Interactive Degree Audit <sup>[1]</sup>

## Interactive Degree Audit

Interactive Degree Audit <sup>[2]</sup>

### What is it used for?

- Advisors and students can see what degree requirements have been, and need to be, fulfilled.
- Official program used to certify graduation requirements.
- Used by all students but best for upperclassmen and students who are graduating soon.

## VS

## G4 Degree Planning Tool

G4 Degree Planning Tool <sup>[3]</sup>

### What is it used for?

- 4-Year Degree Scheduling
- NOT the same as an audit, more of a scheduling tool for future semesters.
- G4 gives a semester-by-semester breakdown including; minimum hours to take each semester, what if scenarios for changing engineering majors, and future courses.
- Can be adjusted with things like certificate programs, study abroad, internships, and co-ops. Sometimes combines courses without thought to the course load, please consult with an advisor if you feel that the program suggests a schedule or courses that seems strange or too heavy to be taken at the same time.
- Great for Freshmen and Lower Division students.
- 

**NOTE:** UT students are encouraged to regularly meeting with their ECE advisors. IDA is not a substitute for required advising when removing a bar placed by a department. IDA is simply a tool and does not register you for courses or add you to any waitlist. If you have questions please contact the ECE Undergraduate Office.
