Engineering Education and Research Center (EERC) - ECE's New Home

The Engineering Education and Research Center (EERC) is designed as a state-of-the-art interdisciplinary education and research hub. With 430,000 square feet geared toward interaction, collaborations, and practical hands-on problem-solving lab space, the EERC will change the face of engineering education on campus.

Industry collaborators are in good company as they join other distinguished corporations.
Inside the
Engineering Education and
Research Center
Opening 2017

Qualcomm
Funding to develop a faculty/graduate
student research laboratory for
networking and communications

Cameron
Funding to support individual
student project space

ConocoPhillips
Funding to support individual
student project space

Texas Instruments
Funding to develop state-of-the-art
analog and embedded systems
laboratories to promote hands-on
learning for students

Schlumberger
Funding to support space for
engineering student organizations

National Instruments
Funding to provide a large
interdisciplinary space for
student projects to promote
practice in innovation
