- Mentoring programs
- Health/wellness reimbursement program
- On-site cafeteria
- Community involvement
- Sustainability/green initiatives
- On-site cafeteria

### Interesting Projects

- Software Defined Networks - Fujitsu is actively participating in the revolution for Software Defined Networks. From various proof of concept projects to product development, FNC is always pursuing the latest telecom technologies and concepts.
- Network Function Virtualization - Hand and hand in with SDN, FNC is invested in productizing Network Function Virtualization and to bring the latest solutions to its customers.
- 1FINITY Next Generation - Fujitsu’s next generation product, 1Finity offers numerous opportunities to learn new technologies and apply fresh ideas to a stable and experienced backdrop.
- Agile Development - FNC is always improving its development methodology. Agile, scrum development with high collaboration and open communication makes working at Fujitsu exciting and energetic.
- Real-time Embedded - Most FNC projects are on real-time and embedded systems. Challenges to meet evolving requirements and meet high performance standards while working with hundreds of engineers guarantees invaluable experience.
- Test Automation – Python - Well known for quality, Fujitsu takes testing and verification very seriously. There are numerous opportunities in effective testing and automation.
- International Development – With three sites in the US (Sunnyvale, CA, Pearl River, NY and Richardson, TX) and offices in Japan and India, Fujitsu provides experience working internationally and with worldwide talent.
- Services Solutions – FNC designs and implements integrated networks including wireless, data networking, and network management solutions to provide end-to-end solutions for our customers.
